

We always endeavour to “look after” our customers to ensure they are getting the service and solution that they require. Whilst on site we have three main opportunities to reduce activity (please see above) Tracking, baiting and repairs to be carried out and undertaken on site to identify evidence of pest activity on site. Once evidence has been identified we can begin to install solutions to eradicate the on going issues that you have been having.

Within our three visits our fully trained and competent pest controllers will track the pests and search for any opportunities on site to kill off recent activity and make repairs to the root cause issue to eliminate the problem going forward.

TRACKING

- Investigations on site
- Evidence tracking
- Tracing of pest
- Searching for root cause issue

BAITING

- Installation of bait stations
- Bait to be monitored
- Bait will give indication of activity on site
- Bait to be placed in specific areas to reduce pests

REPAIRS

- Repairs can be carried out on site
- Agreed price of works before commencement
- Proofing to alleviate activity inside of property
- Repairs to be made in line with activity on site
