

**THREE VISIT PROCESS SOLUTION - Help Us To Help You!**

Whilst we carry out our Three Visit Process solution, we find that working with our customers is the best way to track, trace and find the pests on site and can lead us to the root cause issue.

Our lines are always available so do not hesitate to call us to have a chat about the sorts of things you’re seeing at the property which will point our pest controller in the right direction for our next visit.

Should you experience any untoward or heightened activity on site since our visit, do not worry, we are here to protect your property and look after you so jump on the phone and let’s chat and see how we can help!

**Whilst we’re off-site – Use your senses!**

<b>Keep an ear out for any noises at the property</b>	Footsteps, scratching, chewing & squeaks
<b>Keep a nose out for any smells at the property</b>	Urine, smell of death (when you smell it, you’ll know!)
<b>Keep an eye out for any evidence of pest intrusion at the property</b>	Rodent tracks, damage to the property, holes on site, debris from chewing, urine/droppings and the rodent itself

Using your sense is sometimes the best way to track, trace and identifying your ongoing issues, so whilst were off-site please bear this in mind and work with us to help hunt down the nesting area of the rodent so that we can exterminate and alleviate pest activity from site.

**Additional products available**

In line with our Three Visit Process Solution we can offer additional products and services to further help you at your property – these additional solutions when put in place with help with on going issues so do not hesitate to ask us about what else we can do to help you and your pest control problem.
